Ancillary facilities	:	supporting infrastructure that are not directly involved in the main industrial processes, but are essential for safe, reliable, and continuous plant operation
Bevelling	:	machining process that creates angled cuts on pipe ends to prepare them for welding to create proper weld joint geometry for welds that fully join the pipes together. Bevelled edges allow the welder to fill the entire joint from the inside surface to the outside surface, creating a strong, leak-proof connection
Bolting	:	a process of joining components together using bolts to create secure mechanical connections
CPC	:	Certificate of Practical Completion
Electrical instrumentations	and	an electrical system generates, distributes, and controls electrical power to run the plant's equipment; whereas instrumentation are devices used to measure, monitor and control the plant's process variables (e.g. pressure, temperature, flow and level) using gauges, analysers, flow meter and transmitters, amongst others. Examples of electrical and instrumentations are switchgears, switchboard, uninterruptible power supply, gauges, analysers, flow meter and transmitters
Engineering drawing	design	: 2D or 3D representation of an object, such as a mechanical part or a piping system. Engineering design of a piping system involves the designing of piping systems in a manner that ensures the pipes are custom-fitted to the layout, operational requirements and structural constraints of the plant environment, including provision of precise dimensions, materials and tolerances for fabrication
EPCC	:	refers to engineering, procurement, construction and commissioning, whereby EPCC companies are contractors involved in all activities from engineering, procurement, construction to commissioning and handover of a project to the project owner
Flange facing	:	a machining process that creates a smooth, flat, and properly finished sealing surface on the face of a flange. This is to ensure proper gasket seating and leak-tight connections
Fouling	:	the accumulation of unwanted deposits on the inner surfaces of pipes, which reduces their efficiency and performance
Hydrotesting	:	a quality assurance procedure that uses pressurised water to test the integrity and leak-tightness of completed pipe systems
Mechanical unit	:	mechanical components in a plant that do not have any rotating or moving parts. Mechanical units are used to contain fluid or gases under high temperature or pressure, enable chemical reactions, facilitate heat transfer, provide storage or support process control. Examples of mechanical units include process columns, pressure vessels, heat exchangers, refiner tanks and storage tanks

3.2 OUR GROUP

Our Company was incorporated in Malaysia under the Act on 13 March 2019 as a private limited company under the name Pioneer Heat Holdings Sdn Bhd. We converted to a public limited company on 23 October 2025 to facilitate the Listing.

Our Company was incorporated as an investment holding company. Through our subsidiaries, our Group is principally involved in the (1) provision of mechanical engineering services and (2) civil engineering projects to construct industrial and ancillary facilities.

As at the LPD, the structure of our Group is as follows:

Further details of our Group are set out in Section 6.2 of this Prospectus.

3.3 PRINCIPAL BUSINESS ACTIVITIES AND SERVICES

We are a mechanical engineering service provider, with core expertise in piping system engineering and related specialised services such as heat treatment services, flange management and NDT services. Our mechanical engineering services primarily serves the oil and gas, petrochemical, utility and manufacturing industries.

We are also involved in civil engineering projects to construct industrial and ancillary facilities. We are involved in the implementation of construction projects, which includes daily project management of all the construction works required for timely completion of the projects. We engage subcontractors to execute the construction works for all our civil engineering projects to construct industrial and ancillary facilities. Depending on the scope of work, we may supply machinery for earthworks or provide installation of fencing and internal partition.

Our business activities can be summarised in the business model below:

Principal business	Mechanical engineering services (a) Piping system engineering (b) Specialised services • Heat treatment services • Flange management • NDT services	Civil engineering projects • Construction of industrial and ancillary facilities • Focus on project management
Customers	• Contractors (Main contractors and subcontractors) • Industrial end-users (plant owner/operators)	• Contractors (Main contractors and subcontractors)
End industries served	• Oil and gas • Petrochemical • Utility • Manufacturing	• Public utilities • Oil and gas

Further details on our Group's principal business activities and services are set out in Section 7.2 of this Prospectus.

3.4 COMPETITIVE STRENGTHS

The following competitive strengths have driven our past business performance and will support our future growth:

- (i) We have an established history of 29 years since commencement of our business in 1997. We began our journey by providing on-site pre-heating, post-weld heat treatment and hardness test services, supporting new plant construction and ongoing plant operations (i.e. existing plant maintenance, scheduled plant turnarounds, plant modifications, and refurbishment projects) for oil and gas refineries, petrochemical complexes, utility plants and manufacturing facilities. Since 2015, we have grown our business through expansion of our service portfolio to offer a wider range of mechanical engineering services comprising piping system engineering and related specialised services which include heat treatments, flange management and NDT services. We further diversified our capabilities taking on civil engineering projects to construct industrial and ancillary facilities in 2022;
- (ii) We have in-house technical expertise to provide mechanical engineering services comprising piping system engineering, heat treatments, flange management and NDT services. We also have in-house engineering capability to develop weld mapping for the piping systems to facilitate the fabrication and installation processes. In addition, our specialised services are carried out by trained technicians;
- (iii) Our mechanical engineering services support the entire lifecycle of industrial plants, encompassing new plant construction and ongoing plant operations (i.e. existing plant maintenance, scheduled plant turnarounds, plant modifications, and refurbishment projects). Further, our piping system engineering and related specialised services are comprehensive to meet the demands of customers for piping systems in oil and gas refineries, petrochemical complexes and utility plant, covering various aspects of piping system development and maintenance;

3. PROSPECTUS SUMMARY (CONT'D)

- (iv) We primarily support customers operating in the petrochemical, oil and gas as well as utility industries. Having built our network of customer base across the petrochemical, oil and gas as well as utility industries help reduces our dependency on a single industry or customer and mitigates risk from market volatility. Further, as our customers are primarily main contractors, it allows us to tap into our customers' pool of projects to further grow our business; and
- (v) Our key senior management team have accumulated years of experience in their respective fields of expertise, industrial knowledge and in-depth understanding of our business operations. Under their leadership, we have established our industry reputation as a trusted mechanical engineering service provider. The industry reputation that we have established over the years has been crucial to our Group's historical expansion and will continue to play vital roles in our Group's future growth.

Further details on our competitive strengths are set out in Section 7.6 of this Prospectus.

3.5 BUSINESS STRATEGIES AND FUTURE PLANS

Our business strategies and future plans are as follows:

- (i) We intend to further expand our business operations through the construction of our New Sendayan HQ. Our existing headquarters is located in Labu, Negeri Sembilan and serves as our administrative office. In line with our growth strategy, we intend to set up our New Sendayan HQ, comprising our administrative office as well as warehouse and workshop to service customers in the Central region. Through our New Sendayan HQ, we will able to carry out various activities such as fabrication works for pipe spools (up to 12 meters) and pipe structures, hydrotesting works, heat treatment services and valve servicing for customers in the Central region. This is expected to aid our Group in establishing stronger business presence in the Central region thus driving the continued growth of our business.

The New Sendayan HQ will have a total built-up area of approximately 42,790 sq ft, which consists of 3-storey of office building together with 1-storey of workshop and 1-storey of warehouse. The estimated total cost of constructing the New Sendayan HQ is RM8.00 million, where our Group plans to allocate RM4.00 million from our IPO proceeds to set up our New Sendayan HQ within the next 24 months upon Listing. The remaining RM4.00 million will be funded via bank borrowings (RM3.68 million) and internally generated funds (RM0.32 million);

- (ii) We intend to expand our market presence in East Malaysia through the setting up of a new office and workshop in Sarawak ("**New Sarawak Office**"). As at the LPD, we rented a warehouse in Bintulu, Sarawak. The space available at our Bintulu warehouse is limited, which restricts our ability to carry out fabrication works for pipe spools and pipe structures. In order for us to secure more sizable projects in East Malaysia, we will require a larger warehouse and also a workshop which will enable us to undertake fabrication activities for pipe spools and pipe structures. Further, with a larger space, we will also be able to fabricate larger pipe spools (up to 12 meters), as well as provide us a larger storage area for our materials, machinery and equipment, and tools and consumables.

We plan to commence fabrication activities at our New Sarawak Office, as well as relocate the storage of some of our materials, machinery and equipment, and tools and consumables from the Bintulu warehouse to the New Sarawak Office. The New Sarawak Office will have a built-up area of at least 8,000 sq ft, which represents an increase in built-up area of at least 276.8% from our current Bintulu warehouse. We have allocated RM2.07 million of the proceeds from our Public Issue to fund the establishment of New Sarawak Office within the next 61 months upon Listing which will include rental, renovation expenses, purchase of office equipment as well as manpower recruitment; and

3. PROSPECTUS SUMMARY (CONT'D)

- (iii) We intend to purchase new machinery and equipment for our New Sendayan HQ and New Sarawak Office to support future mechanical engineering projects, as well as for our Pasir Gudang warehouse to drive the continued expansion of our service offering. We intend to allocate RM4.00 million from our proceeds from the Public Issue, to fund the purchase of these machinery and equipment which is to be utilised within 24 months from the date of the Listing.

Further details on our business strategies and future plans are set out in Section 7.7 of this Prospectus.

3.6 RISK FACTORS

Our business is subject to a number of risk factors which may have a material adverse impact on our business, financial condition and results of operations. The following is a summary of the key risk factors that we face in our business operations:

- (i) We are subject to risk of revocation, suspension or non-renewal of approvals, licences, registrations and permits required to operate our business. Our Group is required to maintain and regularly renew various approvals, licences, registrations and permits issued by various governmental authorities and regulatory agencies, and these approvals, licences, registrations and permits are essential for the conduct of our business and operations.

We leverage on existing approvals, licences, registrations and permits to continue our core business operations. We are required to comply with the restrictions and conditions imposed by the relevant authorities for us to maintain the validity of such approvals, licences, registrations and permits. If we are unable to comply with the applicable requirements or required conditions of our approvals, licences, registrations and permits, such approvals, licences, registrations and permits may be suspended or revoked and this may materially and adversely affect our business operations. Any failure to maintain or renew our approvals, licences, registrations and permits in the future could materially and adversely affect our business operations and financial performance.

- (ii) The project-based nature of our Group's business may result in the fluctuation of our sales and result in uncertainties of our overall financial performance. Our mechanical engineering services and civil engineering projects are conducted on a project basis, secured through purchase orders or contracts, whereby the number of orders and contracts secured vary from year-to-year and the value of each order and contract varies from one another, depending on factors such as type of services required and project duration.

The future revenue and profitability of our Group will therefore depend on our ability to continuously secure new purchase orders and contracts from our existing or new customers (i.e. contractors and industrial end-users) where we mainly serve as subcontractor. There is no assurance that our revenue or profit will remain at similar levels each year as it depends on the number and value of purchase orders and contracts secured, as well as timing of delivery which is subject to customer's site readiness. As our purchase orders and contracts are awarded on a one-off basis, there is no assurance that our existing customers will continue to engage us for their new projects.

3. PROSPECTUS SUMMARY (CONT'D)

- (iii) We are dependent on 3 of our major customers, namely Samsung E&A Malaysia Sdn Bhd (formerly known as Samsung Engineering (Malaysia) Sdn Bhd), Ilmiah Perdana Sdn Bhd and Fumiko Sdn Bhd. Collectively, Samsung E&A Malaysia Sdn Bhd (formerly known as Samsung Engineering (Malaysia) Sdn Bhd) and Ilmiah Perdana Sdn Bhd contributed 45.9% of our Group's total revenue in FYE 2024; Samsung E&A Malaysia Sdn Bhd, Ilmiah Perdana Sdn Bhd and Fumiko Sdn Bhd contributed 54.5% of our Group's revenue in FYE 2025; and Samsung E&A Malaysia Sdn Bhd and Fumiko Sdn Bhd contributed 43.3% of our Group's revenue in FYE 2026. Further, Samsung E&A Malaysia Sdn Bhd was recorded as one of our top 5 major customers for 3 consecutive FYEs during the Financial Years Under Review, while Ilmiah Perdana Sdn Bhd and Fumiko Sdn Bhd were each recorded as one of our top 5 major customers for 2 consecutive FYEs during the Financial Years Under Review.

Given our past and ongoing projects with Samsung E&A Malaysia Sdn Bhd, Ilmiah Perdana Sdn Bhd and Fumiko Sdn Bhd, they may continue to contribute significantly to our Group's revenue in the future. There is no assurance that we will not encounter any issues arising from our contracts with Samsung E&A Malaysia Sdn Bhd, Ilmiah Perdana Sdn Bhd and Fumiko Sdn Bhd in future which may adversely affect our financial performance and business operations.

- (iv) We are exposed to risk of delays, substandard performance and disputes relating to certain works outsourced to subcontractors. We outsource the installation and commissioning of electrical and instrumentation works, surface finishing works (e.g. blasting and painting works for pipe spools and pipe structures), servicing of control valves, and installation of scaffolding to facilitate installation activities to subcontractors for our provision of mechanical engineering services. As and when required, we may also outsource installation, welding and fabrication works to third party subcontractors to speed up the completion of work required for our provision of mechanical engineering services. Further, as at the LPD, we engage subcontractors to execute the construction works for all our civil engineering projects to construct industrial and ancillary facilities. We generally do not enter into long-term contracts with our subcontractors and we engage their services on a purchase order basis or project basis. Our subcontractor costs accounted for approximately 24.7%, 25.2%, 58.4% and 86.8% of our total purchases during the Financial Years Under Review.

There is no assurance that the quality of work performed by our subcontractors as well as the completion timeline will consistently and satisfactorily meet the standards and requirements set out by our Group or our customers at all times. Moreover, our subcontractors may experience operational or financial disruptions that could affect their ability to fulfil their obligations, potentially delaying or compromising the completion of our Group's projects.

- (v) We are dependent on our management team for the continued success and growth of our business. Our Group's continued success, future business growth and expansion are, to an extent, dependent on our management team's experience, expertise and continuous efforts. Our Executive Directors and key senior management have been actively involved in our Group's operations, and their long service, in-depth knowledge on all aspects of our Group's operations, as well as their industry experience is crucial to the business continuity and future growth of our Group.

Any loss of our Executive Directors and/ or key senior management simultaneously or within a short time span without suitable and timely replacement, or our inability to attract and retain qualified and competent personnel or to integrate new personnel, could adversely affect the business operations, financial performance and the future growth of our Group.

Our Group plans to allocate RM4.00 million or 18.5% from our IPO proceeds to set up our New Sendayan HQ, comprising our administrative office as well as workshop and warehouse to service customers in the Central region.

Our existing rented headquarters is located in Labu, Negeri Sembilan. In September 2019, we acquired a piece of industrial freehold land with a total land area of 107,155 sq ft located in Sendayan, Negeri Sembilan. We plan to build our New Sendayan HQ on the said land and relocate our headquarters to the New Sendayan HQ. Upon the relocation of our headquarters to the New Sendayan HQ, we will cease the rental of our existing current headquarters in Labu, Negeri Sembilan.

The New Sendayan HQ will have a total built-up area of approximately 42,790 sq ft, which consists of 3-storey of office building together with 1-storey of workshop and 1-storey of warehouse. The breakdown of the total built-up area of our New Sendayan HQ is as set out below:

Our materials, machinery and equipment, tools and consumables, as well as irradiating apparatus that are used to support works carried out in Peninsular Malaysia are stored at our Pasir Gudang warehouse.

The New Sendayan HQ will enhance our operations in the following manner:

- (a) To expand our customer base in the Central region by providing prompt service response as well as logistics cost savings to customers in the Central region;
- (b) Provide a storage area with a built-up area of approximately 7,764 sq ft to store materials, tools and consumables, heavy machinery, vehicles as well as various machinery and equipment; and
- (c) Provide us with the capacity to recruit additional manpower to support the future growth of our business.

The indicative timeline for the construction of our New Sendayan HQ is set out below:

Timeline	Description
Q3 2025	• Commencement of land clearance and earthworks
Q2 2026	• Commencement of building works
Q3 2027	• Completion of construction
Q1 2028	• Purchase of machinery and equipment
Q2 2028	• CCC and other relevant approvals obtained • Completion of interior fit-out
Q3 2028	• Relocation and commencement of operations

Our Group has obtained the requisite approval from Majlis Bandaraya Seremban on 19 September 2024 for the commencement of the construction. Our Group has commenced the land clearance and earthworks in 3rd quarter of 2025 using in-house labour and machinery. Further, our Group has commenced the building works for the construction of the office building, warehouse and workshop in the 2nd quarter of 2026, carried out via our appointed subcontractors. As at LPD, we have incurred approximately RM0.58 million by utilising our internally generated funds, of which RM0.16 million has been capitalised under property, plant and equipment in FYE 2026. The construction of the office building, warehouse and workshop will be carried out by our subcontractors.

Kindly refer to Section 7.7.1 of this Prospectus for detailed information relating to the New Sendayan HQ.

(ii) New Sarawak Office

Our Group plans to allocate RM2.07 million or 9.5% from our IPO proceeds to set up a new office and workshop in Sarawak ("**New Sarawak Office**").

As at the LPD, we have rented a warehouse in Bintulu, Sarawak. Our Bintulu warehouse is a 2-storey semi-detached light industrial building which has a built-up area of approximately 2,123 sq ft. It is used to store materials, machinery and equipment, tools and consumables, as well as to carry out in-house maintenance works on our machinery and equipment in our Bintulu warehouse. The space available at our Bintulu warehouse is limited, which restricts our ability to carry out fabrication works for pipe spools and pipe structures. We currently utilised approximately 80.0% of available warehouse area. As we do not intend to purchase any new machinery and equipment for our Bintulu warehouse prior to the establishment of our New Sarawak Office, the space available at our Bintulu warehouse is sufficient for our current operational needs.

4. DETAILS OF OUR IPO (CONT'D)

In order for us to secure more sizable projects in East Malaysia, we will require a larger warehouse and also a workshop which will enable us to undertake fabrication activities for pipe spools and pipe structures. Further, with a larger space, we will also be able to fabricate larger pipe spools (up to 12 meters), as well as provide us a larger storage area for our materials, machinery and equipment, and tools and consumables. We have identified an existing workshop located at Jalan Tanjung Kidurong, Bintulu, Sarawak, for this purpose. This New Sarawak Office will be rented from third party and will have a built-up area of at least 8,000 sq ft, which represents an increase in built-up area of at least 276.8% from our current Bintulu warehouse. We expect to commence the rental of New Sarawak Office in the fourth quarter of 2026.

We plan to commence fabrication activities at our New Sarawak Office, as well as relocate the storage of some of our materials, machinery and equipment, and tools and consumables from the Bintulu warehouse to the New Sarawak Office. Upon relocation, we will continue the rental of our Bintulu warehouse to store materials, machinery and equipment, as well as tools and consumables for our NDT services as we continue to increase the range of our NDT service offerings to customers in East Malaysia.

We have allocated RM2.07 million of the proceeds from our Public Issue to fund the establishment of New Sarawak Office within the next 61 months upon Listing, details of which are as follows:

Description	No. of units / pax	Total estimated cost RM'000
Office		
Rental (for 60 months)	-	480
Renovation expenses	-	100
Office equipment		
Computers	5	12
Printers	1	2
Office equipment such as furniture and fittings	-	5
Manpower recruitment (for 24 months)		
Project Manager	1	264
Engineers	1	302
QAQC manager and inspector	2	336
Executives	2	194
Site workers	3	374
		2,069

The timeline of 61 months is intended to cover the payment of rental over a period of 60 months, as well as payment of salaries for manpower recruitment over a period of 24 months. We plan to commence the rental of the New Sarawak Office within 1 month after the Listing and thereafter commence its operations after completion of minor renovations (i.e. estimated to be within Q4 of 2026).

If the actual cost of establishing the new office and workshop is higher than the amount budgeted, the deficit will be funded via internally generated funds. Conversely, if the cost is lower than the amount budgeted, the excess will be utilised for our Group's working capital requirements.

Kindly refer to Section 7.7.2 of this Prospectus for additional details of the New Sarawak Office.

The purchase of these new machinery and equipment will add on to our existing list of machinery and equipment, allowing us to further expand our service offering and/or reduce our reliance on the services of third party service providers.

(3) Working capital

Our Group's working capital requirements are expected to increase in line with our participations in tenders and quotations to secure sales. We intend to allocate RM7.90 million or 36.4% from our IPO proceeds for our working capital use, which includes RM5.53 million (70.0%) allocated for the payment for subcontractor services and purchase of materials, tools and consumables such as raw materials, equipment parts, and consumables required for project delivery, as well as RM2.37 million (30.0%) allocated for the issuance of performance bonds for our projects.

For the Financial Years Under Review, our purchases made (based on cost of sales) and performance bonds issued (which were funded via internally generated funds as well as bank borrowings) are as follows:

	FYE 2023		FYE 2024		FYE 2025		FYE 2026	
	RM'000	%	RM'000	%	RM'000	%	RM'000	%
Purchases								
- Subcontractor services	1,286	28.0	2,166	29.8	9,509	58.6	32,600	89.5

	4,591	100.0	7,275	100.0	16,230	100.0	36,421	100.0

For the Financial Years Under Review, we had utilised bank borrowings to partially finance our working capital as follows:

	FYE 2023	FYE 2024	FYE 2025	FYE 2026
	RM'000	RM'000	RM'000	RM'000
Bank borrowings	1,277	2,136	3,152	8,496

For FYE 2026, our effective rates for the usage of banking facilities for working capital ranges from 3.4% to 12.0%. As such, with the additional working capital of RM7.90 million, we target to reduce our interest expenses by between RM0.27 million to RM0.95 million per annum.

The additional RM7.90 million from our IPO proceeds for our working capital use is expected to improve our profitability in the following manner:

- (i) reduce our reliance on borrowings for the payment for subcontractor services and purchase of materials, tools and consumables, which will effectively reduce our interest expense and improve our profitability while reducing our gearing; and
- (ii) with the availability of additional working capital from our IPO proceeds, we can expand our capacity to undertake more projects by participating in more tenders and quotations to secure sales which will lead to improvement in our profitability.

(4) Estimated listing expenses

An amount of RM3.70 million or 17.1% from our IPO proceeds is allocated to meet the estimated cost of our Listing. The following summarises the estimated expenses incidental to our Listing to be borne by us:

5. INFORMATION ON PROMOTERS, SUBSTANTIAL SHAREHOLDERS, DIRECTORS AND KEY SENIOR MANAGEMENT (CONT'D)

- (i) the involvement of our Independent Non-Executive Directors will not affect their contributions to our Group as they only attend board meetings to provide oversight and check-and-balance to our Group's affairs. Their roles are to ensure that our Group has the proper corporate governance in conducting our business activities from time to time; and
- (ii) the involvement of our Executive Directors in those business activities do not require significant amount of their time as they are not involved in the management and day-to-day operations of these business. Such businesses do not require their involvement on a daily basis as these businesses are managed by their respective management.

Based on the above considerations, our Board is of the view that the involvements of our Directors in other companies do not affect their abilities to perform their executive roles and responsibilities to our Group. Our Executive Directors spend most of their time in the operations and affairs of our Group. As such, their involvements in other businesses and operations outside of our Group are not expected to have any effect on their contribution to our Group.
